They Then Set His House on Fire and Leave Him to Perish.

After Runsacking the Building From Top to Bottom—In: the Scuffs One of the Men Loses His Mask and is Recognized as a Neighbor.

PEEBLES, O., Sept. 3.—Thursday evening about 9 o'clock occurred a crime which among the many bloody deeds of Adams county stands without a paral-

John Crothers, a well known farmer who lives near Louisville, a little hamlet four miles northwest of this place, was about to retire, when some one called him to the window, saying his come at once. Before he could reply of friends at Mt. Olivet. the door was burst open with a rail, and he was seized by four masked men. Crothers is a large, muscular man, and struggled fiercely. He grabbed his shotgun, but it was wrenched from his hands before he could use it. The men threw him to the floor and stamped upon him until he became insensible, after which they robbed him of all the money on his person, about \$80, and ransacked the house from top to bottom, taking every thing of value. The fiends then bound the belpless man, cut him in several places and poured coal oil on the bed clothes and set fire to the house, leaving him to perish in the

Shortly after their departure he re gained consciousness and managed to roll himself out into the yard, where he lay watching his property burn. The light was seen from the Louisville church, where prayer meeting was being held, and a party set out for the fire to render assistance. They stumbled over Crothers, who was again uncon-sclous, and carried him to the residence of a neighbor near by, and medical as-sistance was rendered. The wounds are serious, though not necessarily fatal

In the scuffle one of the masks worn by one of the men was torn from his face, and Crothers recognized David Matthews, a farmer living near May Hill. Matthews was arrested and brought before 'Squire J. W. Mason. At the preliminary trial Crothers swore positively as to the identity of Matthews as one of his assailants, but Matthews claims he is able to prove an alibi.

Justice Mason bound him over to court in the sum of \$1,000, and bond was given.

Excitement runs high at Louisville. and there is every prospect of a lynching, if any clew to the perpetrators of the crime is found. The residence of Crothers, together with its contents, was totally destroyed.

## Love-Making on the Stage.

"The art of making love on the stage is one that few actors acquire," said an old Thespian. "A woman naturally doesn't get on to the æstheticism of the thing with the same ease and grace. Harry Lacy was a dream of a lover, though. He had a trick of weaving his arms about a woman with a sinuous, seductive movement that brought a little lump into the throat of every woman in his audience. He always preferred approaching a woman from behind and then drawing her back into arms that seemed made for that purpose Edwin Hoff, with the Bostonians, isn't a bad lover by any means. Funny things, while on this topic, but you know when Barrymore was supporting Langtry they hated each other worse than poison. He declares she would put pins in her bodige to stick him, and they kept up a regular quarrel the whole time they were billing and cooing and embracing in the most ardent fashion. 'Don't hold me so tight, sir: you have evidently never had your arms around a lady, Langtry would say in a whisper. If you knew how thoroughly distasteful this is to me you would never accuse me of getting near you,' he would reply. Do people ever make love on the stage? Not that I know of; it is all purely business.

#### ROW. A LITTLE

Clash of Authority Between Federal and State Governments.

Dr. Jenkins, of New York, Doesn't Like the President's Action

In Regard to Detaining Vessets in Quarantine for the Space of Twenty Days.

L. and Says He Will Exercise His
L. Discretion in the Matter.

New York, Sept. 3.—There seems a probability of a clash of authority arbing between the federal government and the state authorities, as represented by Dr. Jenkins.

The recent order of the president forbids any vessel carrying immigrants to enter port until after twenty days' quarantine.

Dr. Jenkins said be would use his discretion about keeping a vessel in quarantine for twenty days. If he saw fit he would quarantine a vessel more than twenty days, or less. He claimed that he had full authority, and that the president's order could not affect him, or cause him to do otherwise than as

his judgment induced him. "I don't want to be understood as defying the chief executive," said Dr. Jenkins "I shall do all in my power to assist the national authorities in keeping cholers from entering the country, but I certainly think I have the right, by virtue of the authority delegated to me as health officer of this port, to decide on the number of days that a ship shall be kept at quaran-

tine. "I shall decide the question in the case of each ship according to the sandtary conditions prevailing on board at the time of her arrival here.

"I am acting independently of the president. I don't mean by that that I am going to allow a cholera-infeoted vessel to enter the port of New York. I realize my responsibility with reference to the city of New York just as Many of Schiaperelli's canals have been much as the president realizes his responsibility in regard to the country. Conditions might be such that a quarantined vessel could safely be released in five days, and again, if disease kept breeding, she might be detained a year."

Collector Hendricks said he did not think Dr. Jenkins would bring on a conflict between the federal and state authorities. But if such a thing should arise the federal power would prevail. No vessel can land passengers or cargo until the vessel is entered at the customhouse, and Collector Hendricks will act according to instructions of the Washington authorities. McCarthy and Craig Doomed.

COLUMBUS, O., Sept. 8.-A double hanging will occur at the penitentiary for the West will not be allowed to leave the cars in passing through the city. Immigrants who stop there will also be quarantined.
